HANDOUT NOTES

ONLINE MARKET SPACE

- The online market space is considered a bi-directional unit as both the buyers and sellers can buy and

sell through transactions in such portals.

- Notable examples of market space are micro-blogging sites, e-commerce platforms, etc. like twitter, ebay.com, quicker.com, Myntra, Etsy, Alibaba, Amazon.com, etc. Electronic transactions

are used for the distribution of goods and services in the marker space.

Characteristics of online market space

- The transactions that take place in the online market space occurs via online media or internet
- There is no face-to-face transaction as the electronic media does not offer any such option
- An interested party can find information in the market space about the available products and not

anything about the products

- There are no actual showrooms or physical stores. These are replaced by the internet and computers that enable the option of buying

Significant components of online market space

1. Buyers
2. Sellers
3. Intermediaries
4. Other business partners
5. Products
6. Back end
7. Infrastructure
8. Front end
9. Support services

Objectives of online market space

- Establishing brand awareness through the market space
- Selling a product or a service in the market space

- Providing product support
- Offering customer service via the market space

Advantages of online market space

- The market space is already an established market, and there is no need to create demand
- The cost of products in market space is very less compared with the value of products in physical

stores as the sites can save additional expenses like stocking costs, maintenance of physical stores

and transportation costs

- An essential advantage of market space is that it is convenient for the consumers as they do not

have to travel from one market place to another in search of the products they require

- A market space does not need rent nor does it require the physical presence of the employees
- Shopping at market space is very easy with a single click of the mouse
- As the internet is available almost everywhere, there is no such problem as inaccessible
- It is possible to see the acceptability of a product by going through the reviews

Disadvantages of market space

- The market space cannot boast of any direct communication between the buyer and the seller

- As the customer base is shared with several sellers, the market space losses the opportunity of

upselling and cross-selling the products

- There is no customer loyalty in market space because they are not regular visitors. They are random visitors who like things and then buys as there are several options available to them
- The competition level in the market space is anytime higher than found in other market places
- Market spaces are known for offering various discounts and incentives to lure in the customers. Even if the sales volumes increase the profit margins do not appear at the same rate.

DIGITAL MARKETING STRATEGY:

Digital marketing encompasses a wide range of strategies and tactics. Here's a list of some commonly used strategies in digital marketing:

BA4014 DIGITAL MARKETING

1. **Search Engine Optimization (SEO):** Optimizing your website and content to rank higher in search engine results pages (SERPs) to increase organic traffic.
2. **Content Marketing:** Creating and distributing valuable, relevant content to attract and engage your target audience.
3. **Social Media Marketing:** Leveraging social media platforms to build brand awareness, engage with customers, and drive traffic to your website.
4. **Email Marketing:** Sending targeted emails to nurture leads, retain customers, and promote products or services.
5. **Pay-Per-Click Advertising (PPC):** Running paid advertising campaigns on platforms like Google Ads or social media to drive immediate traffic and conversions.
6. **Affiliate Marketing:** Partnering with affiliates or influencers to promote your products or services in exchange for a commission.
7. **Content Syndication:** Distributing your content on third-party websites or platforms to expand your reach.
8. **Video Marketing:** Creating and sharing videos to convey messages, educate, entertain, or showcase products.
9. **Influencer Marketing:** Collaborating with influencers or industry experts to promote your brand to their followers.
10. **Remarketing/Retargeting:** Displaying targeted ads to users who have previously interacted with your website or products.
11. **Marketing Automation:** Using software and tools to automate repetitive marketing tasks, personalize content, and nurture leads.
12. **Analytics and Data Analysis:** Monitoring and analyzing data to measure the performance of marketing campaigns and make data-driven decisions.
13. **Mobile Marketing:** Optimizing marketing efforts for mobile devices, including mobile apps and mobile-responsive websites.
14. **Chatbots and AI-driven Marketing:** Using chatbots and artificial intelligence to provide personalized customer experiences and automate customer interactions.
15. **Local SEO and Listings:** Optimizing your online presence for local searches, especially important for businesses with physical locations.
16. **E-commerce Marketing:** Strategies specifically tailored to online retailers, including product listings, shopping ads, and conversion optimization.
17. **Voice Search Optimization:** Adjusting your content and SEO for voice search queries as voice-activated devices become more popular.
18. **Community Building:** Engaging with and nurturing online communities, forums, or social groups related to your industry or niche.

19. **Customer Reviews and Reputation Management:** Encouraging and managing customer reviews to build trust and credibility.
20. **User-generated Content (UGC):** Encouraging customers to create and share content related to your brand or products.

These strategies can be combined and customized based on your business goals, target audience, and industry to create an effective digital marketing plan.

SOME OF THE KEY COMPONENTS OF DIGITAL MARKETING:

1. **Website:** A well-designed and user-friendly website is the foundation of digital marketing. It serves as your online storefront and provides a platform for all other digital marketing efforts.
2. **Content Marketing:** Content is at the core of digital marketing. This includes creating and sharing valuable, relevant, and consistent content to attract and engage your target audience. Content can be in the form of blog posts, articles, videos, infographics, and more.
3. **Search Engine Optimization (SEO):** SEO involves optimizing your website and content to rank higher in search engine results pages (SERPs). It includes keyword research, on-page optimization, link building, and technical SEO to improve organic (non-paid) search visibility.
4. **Search Engine Marketing (SEM):** SEM involves paid advertising on search engines like Google and Bing. It includes pay-per-click (PPC) campaigns where you bid on keywords to display your ads in search results.
5. **Social Media Marketing:** This involves creating and sharing content on social media platforms like Facebook, Instagram, Twitter, LinkedIn, and others to build a brand presence, engage with your audience, and drive traffic to your website.
6. **Email Marketing:** Email marketing is a powerful tool for building and nurturing relationships with your audience. It includes sending newsletters, promotional emails, and personalized messages to your subscribers.
7. **Content Marketing:** Content marketing focuses on creating valuable and relevant content to attract and engage your target audience. It includes blog posts, videos, infographics, ebooks, and more.
8. **Affiliate Marketing:** Affiliate marketing involves partnering with other businesses or individuals (affiliates) to promote your products or services in exchange for a commission on sales generated through their efforts.
9. **Influencer Marketing:** Influencer marketing leverages the reach and influence of social media personalities and online influencers to promote your products or services to their followers.

10. **Online Advertising:** This includes various forms of online ads, such as display advertising (banners and image ads), video advertising (pre-roll and in-stream ads), and native advertising (ads that blend with the content).
11. **Analytics and Data Analysis:** Data is crucial in digital marketing. Analyzing website and campaign performance using tools like Google Analytics helps marketers understand their audience and make data-driven decisions.
12. **Mobile Marketing:** With the increasing use of smartphones, mobile marketing involves strategies to reach and engage users on mobile devices through mobile apps, responsive websites, and SMS marketing.
13. **Conversion Rate Optimization (CRO):** CRO aims to improve the percentage of website visitors who take desired actions, such as making a purchase or filling out a contact form, through A/B testing and other optimization techniques.
14. **Marketing Automation:** Marketing automation tools help streamline and automate repetitive marketing tasks, such as email marketing, lead nurturing, and customer segmentation.
15. **Online PR and Reputation Management:** Managing your online reputation and building positive relationships with customers through online PR efforts are essential for long-term success.
16. **Chatbots and AI:** Implementing chatbots and artificial intelligence in customer service and marketing can enhance user experience, provide instant responses, and gather valuable customer data.
17. **Video Marketing:** Video content, whether on social media, YouTube, or your website, is a popular and engaging way to communicate with your audience.

These components are often used in combination to create comprehensive digital marketing strategies tailored to the specific goals and target audience of a business or organization. The digital marketing landscape is continually evolving, so staying up-to-date with the latest trends and technologies is essential for success in this field.

BRAND:

The brand is the distinguishing feature of your business that separates you from your competition. Branding is the practice of giving your business a unique identity.

OPPORTUNITIES FOR BUILDING BRAND IN DMT:

Step 1 – Know Your Customers

Knowing your customers is as important as identifying new customers and building rapport with them. Customer retention is the main way in which you can increase your returns on investment in the long run.

Step 2 – Identify Your Leads

Website traffic, people who have signed up for newsletters, online users were talking about your brand on discussion forums platforms and other social media channels are your leads.

You have to make an effort to spot them and build a relationship based on trust and transparency to turn them into conversions.

Step 3 – SEO+SEM Strategy

A combination of a winning Search Engine Optimisation strategy and search engine marketing strategy can help you rank on the web search results. According to reports, more than 50% of website traffic comes through organic search results on the SERP pages.

You might have amazing content but if it doesn't rank on the first page of the search engine then all of your efforts are futile. This makes keywords any one important part of your Search Engine Optimisation strategy.

Identify the correct keywords, insert them in your copy in the relevant places making your content scannable. Highlight the important points for the Google algorithm to pick up on the relevant aspects of the copy. This is how you can leverage digital marketing to build a brand out of your business.

Step 4 – Consistent Pattern

The uniformity in the key feature of your brand helps users to identify your brand at a glance. Make sure that you have a consistent pattern in the case of your phone sizes styles language the different terms you use the call to action button and the headings. People should be able to relate to your brand the moment this your heading, logo, color scheme, etc.

Step 5 – Social Listening

Social listening is a very important factor in digital marketing planning and strategy. It assists you to create awareness about your brand. You become aware of what your consumers discuss regarding your products or related products and what is important to them.

Therefore it becomes crucial to carry out sentiment analysis to exactly understand what your brand means to your consumers.

Step 6 – Customer Support

With the steady advancement of technology, it has become even easier to provide impeccable customer support to your consumers 24/7.

Good customer support is the differentiating element that helps you to stand out from your competition in the fiercely competitive online market.

In fact, customer support is one of the most critical elements for the sales and marketing and overall branding of your product.

Step 7 – Content creation

Again, a very vital step is to create content to nurture, increase engagement and conversation with your customers to build faith in them. Content can take the form of E-books, blogs, informational newsletters. Headlines, landing pages, webinars, videos Info-graphics anything that disseminates the core value of your business to give it the status of a brand.

Step 8 – Brand Tone and Voice

It is imperative that you decide upon your brand voice and tone for your business. It should reflect the values of the mission of your business. Brand Voice should also clearly describe how your brand is different from the competitors in the market and what you stand for.

After determining your target audience you should always look for the tone that will appeal to them the most. For example, the company Johnson's and Johnson's brand voice is appealing to mothers across the globe.

Step 9 – Facebook/Instagram/twitter/youtube etc...

Facebook is the most popular social media channel all around the world. It is also one of the most important means of selling products to consumers by targeting them in a more precise manner.

Your Facebook business page be professional and should have your brand's core message distinctly. Your business will have a lot of related content on Facebook. Post them on your page and relate them to your brand.

Likewise, you can use the various socialmedia platforms for branding your own brand.

Step 10 –Website Optimization

This is again a very critical feature for your brand to be at the top of the minds of consumers. Website speed testing is important because anything more than 5 seconds and your online user is going to go out of your site.

WEBSITE CREATION AND PLANNING

Website creation and planning is the process of creating a website and planning for it. It involves creating a website and then planning for it, including setting goals, creating content, and making sure that your site performs well.

Website creation and planning are part of the process of creating a website for your business. This involves designing the layout of a website, choosing colors and fonts that represent your brand, adding images and video clips to make it more appealing to visitors, writing content for each page on your site (e.g., "About Us"), and adding social media buttons so visitors can share posts from your blog or news section with their friends on Facebook or Twitter.

Steps involved in website planning and creation:

1. Identify your website goals

2. Identify your target audience
3. Define your unique selling proposition
4. Secure a domain name and hosting
5. Pick a website builder
6. Create and collect design elements
7. Create content for your core website pages
8. Put your website plan into action

1. Identify your website goals

Before you start building a website, you need to know why you are building it.

What is your primary objective?

What do you want your website to accomplish for your business?

Is it strictly informational, or are you selling products?

Are you looking to increase engagement with customers via your site?

Is your goal to leverage your website to bolster year-end profits?

Knowing the answers to these questions will help you create a plan that is strategically tied to your business goals. The purpose of your website is the reason why you want to build it. It's the somewhat obvious reason for what you think a website can do for you. You might think the purpose is to:

- 1 Attract traffic and grow an audience
- 2 Showcase your products
- 3 Share what you know
- 4 Advertise your business
- 5 Entertain your readers

2. Identify your target audience

Once you know what you want users to do on your site, you need to figure out who those users are.

It's critical to clearly identify your website's target audience when planning your website.

If you're trying to attract everybody to your website, you're probably not going to attract anybody. Casting a wide, broad net does little to help with driving traffic, connecting with audiences, or driving conversions. So, you need to know exactly who you are trying to reach.

If you skip this step and fail to clearly identify your target audience, it can lead to a variety of marketing problems.

3. Define your unique selling proposition

So far in your process of planning a website, you've determined your goals and defined your target audience. Now, you can start developing marketing strategies for reaching the audience and encouraging them to act.

The first step in that process is creating a unique selling proposition.

Unique selling proposition:

A unique selling proposition, or USP, is something special that makes your brand, products or services different from and/or better than your competitors.

It grabs the attention of your ideal customers and is the reason why they choose you over all others.

To develop your unique selling proposition, think about your brand, products and services and answer the following questions.

How are you different from your competitors?

Why does that difference matter to customers?

What specific benefit do customers get by choosing you over the competition?

Why does that benefit matter to customers?

4. Secure a domain name and hosting

Now that you have finished a big portion of your website plan, you can get ready to set up your site. Start the process by securing a domain name and hosting.

A domain name, also known as a URL (Uniform Resource Locator), is a web address used to locate and access a website on the internet.

Website hosting is the server space and resources that store a website's files and data.

Think of it this way: Your website is like a house. Your web hosting is the land the house sits on. And the domain is the street address.

5. Pick a website builder

At this point in planning, you're ready to choose how you will build your website.

You have a few options for building your site. You can:

Use a drag-and-drop website builder like the one from GoDaddy.

Use a more advanced content management system like WordPress that requires a bit more technical know-how (although GoDaddy's WordPress Hosting makes starting a WordPress site much easier).

Use custom code and start from scratch rather than using a pre-designed template.

Hire a professional web designer to do it all for you.

6. Create and collect design elements

By now, you have a strategy, domain name and platform for where you will build your site. The next step in this website plan is putting together the content you need to fill your site. Start this process by creating and collecting design elements.

Create and collect brand design elements

Brand design elements are graphical representations of your business. They are the design elements that help customers get to know and remember you. These design elements define your brand personality and help customers feel what your brand represents through the use of:

Colors

Fonts and typography

Logos

Images and photos

7. Create content for your core website pages

Now you have a plan for your website and almost everything you need to build it. You just need one final thing — your copy.

For a standard website, you should have content prepped for five key pages: the home, about, product/service, testimonial/review and contact pages. If you plan to have a blog on your site, you should also have at least one blog post ready to go.

Home page

The home page is your first opportunity to tell your story and start driving website visitors toward the end goal you set out for the site (to get them to join your list, buy a product, etc.).

Lay out your home page content so it introduces who you are, what you do and how you help. This starts to lead visitors down your conversion funnel.

As you create your home page content, remember to:

1 Keep it simple.

Don't go into too much detail. Use short, scannable blurbs and then drive users to longer pages for more information.

2 Put important information first.

Users typically don't scroll very far down the page so put all of the most important information near the top of the homepage.

3 Explain how you help.

Catch attention right away by clearly stating what you do and how you help your audience solve a problem.

4 Present your unique value propositions.

BA4014 DIGITAL MARKETING

Immediately show what makes you different from competitors.

5 Include calls-to-action. Design strategic calls-to-action that move users through your site toward your end goal.

About page

Your about page is a chance to go deeper into who your brand is, what you do and why you do it. Tell a story that answers the following questions:

Who is the site for?

What can visitors do on the site?

Why is the site different from others like it?

Why did you start this venture?

Was there a moment or event that sparked your desire to bring your idea to the web?

Product/service page

It's likely that you are using your website to sell something, whether it is a service that clients must call to schedule or a product that customers can buy directly on the site. So you must have a landing page for your services or an ecommerce product page for your items for sale.

Use this page as an opportunity to showcase and promote your offers

Testimonial/review page

Customers need to learn to trust your brand before they will choose to do business with you.

You can build that trust by creating a page filled with customer testimonials or reviews.

Reviews and testimonials connect with readers in ways that sales copy cannot because the messages are authentic views of other people's experiences with your brand.

Contact page

The contact page may feel like a boring, afterthought page, but it is one of the most visited pages on a website. Plus, it's usually one of the first touchpoints that customers encounter when they decide they are ready to work with or buy from you. So don't overlook this page.

CONTENT MARKETING

Content marketing is the process of planning, creating, distributing, sharing, and publishing content via channels such as social media, blogs, websites, podcasts, apps, press releases, print publications, and more.

The goal is to reach your target audience and increase brand awareness, sales, engagement, and loyalty.

Content marketing importance:

- Educates your leads and prospects about the products and services you offer. According to 23 HubSpot research, 29% of marketers use a blog or website for lead attraction and conversion.
- Boosts conversions.
- Builds relationships between your customers and business that result in increased loyalty, and 30% of marketers are creating content that reflects brand values.
- Shows your audience how your products and services solve their challenges
- Creates a sense of community around your brand.

Types of Content Marketing:

1. Online Content Marketing

Online content marketing refers to any material you publish online, but more specifically, it refers to your web pages. A strong online content marketing strategy will help you rank higher in the search engine results pages (SERPs) and get you in front of the right people at the right time.

HubSpot's home page is one example, immediately engaging visitors with specific content about our products

2. Social media Content marketing

With over 4.5 billion global social media users, it's easy to understand why so many businesses invest in social media marketing. There are many platforms (such as Facebook, Instagram, Pinterest, LinkedIn, Snapchat) to work with, and several ways you can create and share content on each of them (such as photos, live videos, pre-recorded videos, stories).

3. Infographic Content Marketing

Infographics display content, information, and data in an easy-to-understand, graphic format. With a mix of simple wording, short statements, and clear images, infographics are a great way to effectively communicate your content. They work well if you're trying to simplify an educational or complex topic so all audience members can understand it.

4. Blog Content Marketing

Blogs are a powerful type of inbound

Content and allow for a lot of creativity in terms of their purpose and topic. With a blog, you can do things like promote other internal and external content and blog articles with links, add social share buttons, and incorporate product information.

5. Podcast Content Marketing

More than 60 million people listen to podcasts across the Spotify and Apple Podcasts platforms. For this reason, many businesses and media outlets have begun creating and sharing their own podcasts.

Podcasts allow for a lot of creativity as they can be about any topic of choice. Additionally, you decide other factors related to the podcast such as cadence of episodes, who's on the podcast, where you advertise the podcast, and how long episodes are.

6. Video Content Marketing

According to Wyzowl research, 73% of consumers say they prefer to learn about a brand's product or service through video. Additionally, video marketing can boost conversions, improve ROI, and help you build relationships with audience members. You may choose to share your video content on social media platforms, landing pages, or on a co-marketer's website.

7. Paid Ad Content Marketing

Paid ads can help you reach a broad audience and allow you to position yourself in all the places you want to be seen paid ads are especially beneficial when paired with inbound marketing. There are many places you can share paid ads including on social media, landing pages, banners, and sponsored content.

HOW DOES CONTENT MARKETING WORK?

Content marketers attract an audience with compelling stories and by sharing valuable information. They also use content channels to build community.

So, content marketing for business isn't just a technique or strategy, but a unique form of communication. With that in mind, people have different needs at different stages in the buying process. To make sure that your content meets a need at every stage, you'll want to think about your conversion funnel.

Top of the Funnel (TOFU)

At the top of the funnel, you want to build awareness with your content. Your target audience might know they have a problem, but they aren't sure how to solve it. At this stage, you can focus on brand awareness, broad pain points, and common questions.

TOFU content should pull potential customers in to help them better understand a specific problem. This gives you a relevant opportunity to introduce them to your solution.

Useful content types at the top of the funnel include:

Blog posts

Social media posts

Short-form video

Podcasts

Infographics

Checklists

Ebooks

Webinars

Video Ads

Middle of the Funnel (MOFU)

Once a prospect passes to the middle of the funnel, they're considering your product. They may have visited your site more than once or they're engaging with your social media. They might have signed up for your email newsletter.

MOFU content should build a relationship with that person. At this point, they understand their problem and are comparing possible solutions. So, your content should educate them on the specifics of your solution and show how it meets their unique needs.

Great middle-of-funnel content types include:

Email newsletters

Product demos

Landing pages

White papers

Case studies

Longer-form videos

Blog posts

Interactive content

Webinars

Bottom of the Funnel (BOFU)

Bottom-of-funnel content helps your prospect make a decision and ideally, convert. This stage focuses on conversion. So, BOFU content should make it easy to test a product, understand pricing, and make a purchase. Content that converts should drive action and create a sense of urgency. Prepare to respond to common objections and other blockers that can impact sales with Your content.

Bottom-of-funnel content types include:

Personalized emails

User-generated content, like customer testimonials

Case studies

Pricing pages

Competitor comparison blog posts

Video demos

White papers

Remarketing campaigns

UNIT 2

SEO stands for Search Engine Optimization. It is the process of improving the quality and quantity of website traffic to a website or a web page from search engines. SEO targets unpaid traffic rather than direct traffic or paid traffic. As an internet marketing strategy, SEO focuses on increasing the visibility and ranking of a website on search engine results pages (SERPs).

SEO STRATEGY:

An SEO strategy is a plan to create, optimize, and promote content to improve its visibility in search engine results, attracting more organic traffic to a website. It outlines the steps and actions needed to achieve specific SEO goals, such as increasing website traffic, improving search engine rankings, or generating more leads.

Key Components of an Effective SEO Strategy:

- 1. Define Clear SEO Goals:** Establish clear and measurable SEO goals that align with the overall business objectives. These goals should be specific, attainable, relevant, and time-bound (SMART).
- 2. Target Audience Identification:** Understand the target audience, their search behaviors, and the keywords they use to find relevant information. This helps tailor content and optimize website elements to attract the desired audience.
- 3. Keyword Research and Analysis:** Conduct thorough keyword research to identify relevant and high-potential keywords that align with the target audience's search intent. Use keyword tools and analyze search volume, competition, and relevance to prioritize keywords.
- 4. On-Page SEO Optimization:** Optimize website elements to improve its search engine friendliness and relevance. This includes optimizing title tags, meta descriptions, header tags, content structure, and internal linking.
- 5. High-Quality Content Creation:** Produce high-quality, informative, and engaging content that is relevant to the target audience and addresses their search queries. Use relevant keywords naturally within the content.
- 6. Technical SEO Optimization:** Ensure the website's technical structure is optimized for search engine crawlability and indexing. This includes addressing website speed, mobile-friendliness, and schema markup implementation.
- 7. Off-Page SEO and Link Building:** Build backlinks from high-quality and relevant websites to increase website authority and credibility. This can be achieved through guest blogging, content syndication, and social media outreach.
- 8. SEO Performance Tracking and Analysis:** Regularly monitor and analyze SEO performance using analytics tools. Track metrics such as organic traffic, keyword rankings, and website conversion rates.
- 9. Continuous Strategy Adaptation:** Adapt the SEO strategy based on performance data, emerging trends, and algorithm updates. Stay updated on SEO best practices and industry developments.

ON-PAGE SEO TECHNIQUES

On-page SEO techniques help to ensure that your website is well-structured, informative, and optimized for the keywords that your target audience is searching for. Some key on-page SEO techniques include:

- **Keyword research:** Identifying the relevant keywords that your target audience is using to search for information related to your website's content.
- **Content creation:** Creating high-quality, informative, and engaging content that is relevant to your target audience and incorporates your chosen keywords naturally throughout the text.
- **Title tag and meta description optimization:** Writing clear and concise title tags and meta descriptions that accurately represent your website's content and entice users to click on your website in search results.
- **Header tag optimization:** Using appropriate header tags (H1, H2, H3, etc.) to structure your content and make it easier for search engines to understand the hierarchy and relevance of your information.
- **Image optimization:** Adding alt text to images, using descriptive file names, and compressing image files to improve page loading speed and accessibility.
- **Internal linking:** Creating a logical and interconnected network of links within your website to guide search engines and users through your content.
- **Mobile-friendliness:** Ensuring that your website is optimized for viewing on mobile devices, as search engines prioritize mobile-friendly websites.

OFF-PAGE SEO TECHNIQUES

Off-page SEO techniques help to build credibility and authority for your website by demonstrating to search engines that your website is a valuable resource. Some key off-page SEO techniques include:

- **Link building:** Acquiring backlinks, which are links from other websites to your website. Backlinks are considered a vote of confidence for your website, and the more high-quality backlinks you have, the higher your website will rank in search results.
- **Social media promotion:** Sharing your website's content on social media platforms to drive traffic and potentially attract backlinks from other websites.
- **Guest blogging:** Writing and submitting guest posts on reputable websites in your niche to gain exposure and backlinks.
- **Press release submission:** Distributing press releases about your website or business to relevant news outlets and directories, which may lead to backlinks from those sources.
- **Influencer outreach:** Building relationships with influencers in your industry and encouraging them to share your content with their followers, potentially generating backlinks and referrals.

HOW DOES SEO WORKS:

Crawling

The first step in the search engine process is crawling. Search engines use web crawlers, also known as spiders, to index the web. Web crawlers are like robots that follow links from one page to another, downloading the content of each page they visit.

Indexing

Once a page has been crawled, it is stored in the search engine's index. The index is a massive database that contains information about all the pages that the search engine has crawled. The index is used to quickly find pages that are relevant to a user's search query.

Ranking

When a user searches for something, the search engine uses its ranking algorithm to determine which pages to return in the search results. There are many different factors that search engines consider when ranking pages, but some of the most important factors include:

- **Relevance:** The relevance of a page to the user's search query.
- **Authority:** The authority of the website that the page is on.
- **Quality:** The quality of the page's content.
- **Usability:** The usability of the page.

Serving results

Once the search engine has ranked the pages, it returns the most relevant pages to the user in the search results. The search engine may also personalize the results based on the user's search history, location, and other factors.

SEO (SEARCH ENGINE OPTIMIZATION) SUCCESS DEPENDS ON VARIOUS FACTORS, INCLUDING:

Keyword Research:

Identifying and targeting the right keywords for your content is crucial.

Quality Content:

Creating high-quality, valuable, and relevant content that meets the needs of your audience.

On-Page Optimization:

Optimizing your web pages for search engines, including title tags, meta descriptions, header tags, and URL structure.

Mobile-Friendliness:

Ensuring your website is responsive and performs well on mobile devices.

Site Speed:

Fast-loading websites tend to rank higher. Optimize images, use efficient coding, and leverage content delivery networks (CDNs).

Backlinks:

Building high-quality and relevant backlinks from authoritative websites.

User Experience (UX):

Providing a seamless and user-friendly experience on your site can improve SEO.

Technical SEO:

Fixing issues like broken links, duplicate content, and improving site architecture.

Social Signals:

Engaging on social media and having social sharing options can indirectly impact SEO.

Local SEO:

If you have a physical presence, optimizing for local search is essential.

Regular Updates:

Keeping your content and website up to date with fresh information.

User Behavior:

Monitoring user behavior and making improvements based on analytics data.

Security:

Ensuring your website is secure with HTTPS and protecting against cyber threats.

Mobile-First Indexing:

Adhering to Google's mobile-first indexing guidelines.

Voice Search Optimization:

As voice search becomes more prevalent, optimizing for it is important.

Core Web Vitals:

Paying attention to Google's Core Web Vitals, which measure page loading, interactivity, and visual stability.

Structured Data Markup:

Implementing structured data to enhance search results with rich snippets.

Content Promotion:

Actively promoting your content through social media, email marketing, and other channels.

Competitive Analysis:

Keeping an eye on what your competitors are doing and adapting your strategy accordingly.

Patience and Monitoring:

SEO takes time, so regularly monitoring your progress and making adjustments is crucial.

Remember that SEO is an ongoing process, and what works can evolve over time with changes in search engine algorithms and user behavior. Staying informed and adaptable is key to long-term SEO success.

SEM

Search Engine Marketing (SEM) is a digital marketing strategy that involves promoting websites by increasing their visibility in search engine results pages (SERPs) through paid advertising. SEM primarily consists of two key components:

1. **Search Engine Advertising (PPC):** This involves running paid advertisements within search engine results. The most common platform for PPC advertising is Google Ads, although there are others like Microsoft Advertising (formerly Bing Ads).

Keywords:

Advertisers bid on specific keywords or phrases relevant to their products or services.

Ad Creation:

Creating compelling ads with text, images, or other media formats.

Ad Auction:

When a user searches for a keyword, an ad auction takes place, and the highest bidder's ad typically appears at the top of the results.

2. **Search Engine Optimization (SEO):** While SEM often refers to paid advertising, it's important to note that SEO, the process of optimizing a website to rank organically in search results, is also a critical part of improving a site's visibility in search engines. SEO efforts can complement SEM by improving the organic (unpaid) search ranking of a website.

Key aspects of SEM:

Ad Budget:

SEM campaigns require a budget, and advertisers pay when users click on their ads (Pay-Per-Click or PPC).

Ad Campaign Management:

Effective SEM involves careful campaign setup, monitoring, and optimization to maximize ROI.

Targeting:

Advertisers can target specific demographics, locations, and user behaviors to reach their desired audience.

Conversion Tracking:

It's crucial to track conversions (e.g., purchases, sign-ups) to measure the success of SEM campaigns.

Keyword Research:

Identifying and selecting the right keywords is essential for targeting the right audience.

Ad Quality:

High-quality ads and landing pages are rewarded with better ad positions and lower costs per click.

SEM can be a powerful way to quickly drive traffic to a website and achieve marketing goals. However, it's essential to manage SEM campaigns effectively to ensure a positive return on investment (ROI) and avoid overspending. SEM should be part of a broader digital marketing strategy that considers the integration of various channels, including SEO, social media marketing, and content marketing, to maximize the overall online presence and effectiveness of a business.

SEM Components:

Search Engine Marketing (SEM) comprises several key components that work together to create effective paid advertising campaigns. Here are the main SEM components:

Keyword Research and Selection:

Identifying relevant keywords or phrases that potential customers might use when searching for products or services.

Analyzing keyword competitiveness and search volume to make informed decisions.

Ad Campaign Creation:

Developing ad campaigns tailored to specific marketing goals and target audiences.

Creating compelling ad copy, headlines, and visuals to capture user attention.

Ad Groups:

Grouping related keywords and ads together into ad groups to ensure ads are highly relevant to search queries.

Bidding Strategy:

Determining how much you're willing to pay for each click (Cost-Per-Click or CPC) and setting bids for keywords.

Choosing between manual bidding or automated bidding strategies provided by advertising platforms.

Ad Extensions:

Enhancing ads with additional information, such as site links, callouts, phone numbers, and location information.

Ad extensions can improve ad visibility and provide more context to users.

Quality Score and Ad Rank:

Search engines assign a Quality Score to ads based on factors like click-through rate (CTR), ad relevance, and landing page quality.

Ad Rank determines the ad's position in search results and is influenced by the bid amount and Quality Score.

Ad Budgeting:

Allocating a daily or monthly budget to control ad spending.

Monitoring and adjusting budgets to ensure campaigns stay within financial limits.

Ad Scheduling:

Choosing specific days and times when your ads will appear.

Ad scheduling can help target users when they're most likely to convert.

Geo-Targeting:

Selecting geographic locations where your ads will be displayed.

Useful for businesses targeting specific regions or locations.

Conversion Tracking:

Setting up tracking to measure the success of your campaigns, such as tracking sales, form submissions, or other desired actions.

Conversion data helps refine your campaigns for better performance.

Ad Copy Testing:

A/B testing different ad variations to determine which ones perform best.

Testing elements like headlines, ad text, and visuals to optimize for higher CTR and conversions.

Ad Performance Monitoring:

Regularly reviewing campaign performance metrics, including CTR, conversion rate, click cost, and ROI.

Making data-driven adjustments to improve campaign efficiency.

Negative Keywords:

Identifying and excluding irrelevant keywords that may trigger your ads.

Preventing ad spend on searches that are unlikely to lead to conversions.

Remarketing:

Targeting users who have previously interacted with your website or ads.

Showing tailored ads to re-engage potential customers.

Ad Platform Selection:

Choosing the

right advertising platforms based on your target audience and objectives. Common platforms include Google Ads, Microsoft Advertising, and social media platforms like Facebook Ads.

Successful SEM campaigns involve careful planning, continuous optimization, and a focus on delivering value to users to achieve your marketing goals efficiently.

PPC & DISPLAY ADVERTISEMENT

PPC Advertisement (Pay-Per-Click) and Display Advertisement are two distinct forms of online advertising, each with its own characteristics, benefits, and use cases. Let's delve into the details of each:

PPC ADVERTISEMENT (PAY-PER-CLICK):

PPC advertising is a form of online advertising where advertisers pay a fee each time a user clicks on their ad. It's a performance-based model, meaning you only pay when someone takes a specific action (clicks). The most common platform for PPC advertising is Google Ads, but other search engines and social media platforms offer similar options.

Components of PPC Advertisement:

1. **Keywords:** In PPC, advertisers select relevant keywords or search terms that trigger the display of their ads when users search for those terms. Effective keyword research is crucial for reaching the right audience.
2. **Ad Copy:** PPC ads typically consist of a headline, description, and URL. The ad copy should be concise, engaging, and relevant to the selected keywords and the user's search intent.
3. **Bid Management:** Advertisers set a maximum bid for each keyword, which represents the maximum amount they are willing to pay for a click. Ad position in search results is influenced by bids and ad quality.
4. **Quality Score:** Quality Score is a metric used by search engines (e.g., Google) to measure the relevance and quality of your ads and landing pages. It affects your ad's position and cost per click (CPC).

5. **Ad Extensions:** Ad extensions provide additional information or features to your ad, such as site links, callout extensions, location extensions, and structured snippets, enhancing the ad's visibility and relevance.
6. **Budget:** Advertisers set daily or monthly budgets to control their ad spend. Once the budget is exhausted, ads stop displaying until the next budget cycle.
7. **Click-Through Rate (CTR):** CTR is a key metric in PPC advertising, representing the percentage of users who click on your ad after seeing it. A high CTR indicates ad relevance and effectiveness.
8. **Conversion Tracking:** Implement conversion tracking to measure the actions users take after clicking on your ad, such as purchases, sign-ups, or form submissions. It helps assess the ROI of your PPC campaigns.

Benefits of PPC Advertisement:

1. **Immediate Results:** PPC can generate quick traffic and results, making it suitable for businesses looking for immediate visibility.
2. **Targeted Advertising:** PPC allows precise targeting based on keywords, location, demographics, and more, ensuring your ads reach the right audience.
3. **Measurable ROI:** With conversion tracking and detailed analytics, you can measure the ROI of your PPC campaigns accurately.
4. **Control and Flexibility:** Advertisers have control over budget allocation, bidding strategies, and ad scheduling, making it adaptable to changing needs.
5. **A/B Testing:** Easily test different ad variations to optimize campaign performance.

DISPLAY ADVERTISEMENT:

Display advertising involves placing visual banner or text ads on websites, apps, and social media platforms. These ads are typically image or multimedia-based and are shown to users based on their interests, behavior, and demographics. Google Display Network (GDN) and social media advertising platforms like Facebook and Instagram offer display advertising options.

Components of Display Advertisement:

1. **Ad Creatives:** Display ads are visual, so they include images, videos, or interactive elements. Creatives should be eye-catching and relevant to the target audience.
2. **Audience Targeting:** Display ads can be highly targeted based on user demographics, interests, browsing history, and more. Advertisers can choose specific websites or use contextual targeting to display ads on relevant content.

3. **Ad Placements:** Advertisers can choose specific websites, apps, or placements within the Google Display Network where they want their ads to appear.
4. **Ad Formats:** Display ads come in various formats, including banner ads, interstitials, video ads, and responsive ads that adapt to different devices and screen sizes.
5. **Ad Scheduling:** You can set the schedule for when your ads will be displayed to maximize visibility during peak times.

Benefits of Display Advertisement:

1. **Brand Awareness:** Display ads are effective for building brand recognition and exposure to a wide audience.
2. **Visual Appeal:** Display ads allow for creative and visually appealing content, making them suitable for showcasing products or services.
3. **Remarketing:** Display ads can be used for remarketing campaigns, targeting users who have previously visited your website or engaged with your content.
4. **Wide Reach:** Display advertising can reach a vast and diverse audience across the web, including websites, blogs, and mobile apps.
5. **Engagement:** Interactive ad formats can encourage user engagement, such as clicking, watching videos, or interacting with ad elements.

Both PPC and display advertising have their strengths and can be part of a comprehensive digital marketing strategy. The choice between them depends on your specific goals, target audience, and budget. Many advertisers use a combination of both to achieve a balanced approach to online advertising.

UNIT 3

EMAIL MARKETING:

Email marketing is a digital marketing strategy that involves sending emails to a group of recipients with the goal of promoting products, services, events, or building relationships with customers or subscribers. It is a powerful and cost-effective way to communicate with your audience, engage them, and drive conversions.

Email marketing can take various forms and can be categorized into different types based on their objectives and strategies.

TYPES OF EMAIL MARKETING:

Promotional Emails: These emails are designed to promote specific products, services, or offers. They often include discounts, sales announcements, and calls to action (CTAs) to encourage recipients to make a purchase.

Newsletter Emails: Newsletter emails are informational in nature and provide subscribers with updates, news, and valuable content. They help build and maintain customer relationships by offering relevant and engaging content.

Transactional Emails: These emails are triggered by a user's interaction with a website or application. Examples include order confirmations, shipping notifications, password reset emails, and receipts. Transactional emails are typically highly personalized and important for customer experience.

Welcome Emails: Sent to new subscribers or customers, welcome emails serve to introduce them to your brand, products, or services. They can include a warm greeting, a brief overview of what to expect, and sometimes an incentive to engage further.

Abandoned Cart Emails: These emails are sent to users who have added items to their online shopping carts but have not completed the purchase. They aim to remind users of their abandoned items and encourage them to finalize the transaction.

Drip Campaigns (Automated Series): Drip emails are a series of pre-scheduled, automated emails sent to subscribers over a specified period. These campaigns are often used for lead nurturing, onboarding, or educational purposes.

Re-engagement Emails: Sent to inactive subscribers, re-engagement emails aim to revive their interest in your brand. They may offer incentives or remind subscribers of the value they can receive from your emails.

Survey and Feedback Emails: These emails are sent to collect feedback, opinions, or reviews from customers. They help businesses gather valuable insights and improve their products or services.

Event Invitation Emails: Used for promoting and inviting recipients to attend events, webinars, seminars, or workshops. They often include event details, RSVP options, and reminders.

Educational Emails: These emails focus on providing educational content to subscribers. They can include how-to guides, tutorials, industry insights, and tips relevant to the recipient's interests.

Cross-Sell and Upsell Emails: These emails aim to encourage existing customers to purchase additional or upgraded products or services. They are based on the customer's previous interactions and purchases.

Announcement Emails: Used for sharing important company updates, product launches, or major announcements with your subscribers or customers.

Birthday or Special Occasion Emails: Sent to celebrate subscribers' birthdays or other special occasions, often including personalized offers or discounts.

Segmented and Targeted Emails: These emails are highly personalized and sent to specific segments of your email list based on user behavior, demographics, or preferences. Segmentation helps improve relevancy and engagement.

EMAIL AUTOMATION:

Email automation is the process of sending emails to users automatically, based on specific triggers, schedules, or conditions, without manual intervention. It is typically achieved using specialized email marketing automation software or tools that allow businesses or individuals to design, schedule, and send out automated email sequences to their subscribers or customers.

Benefits of email automation

- **Save time and money:** Email automation can save businesses a significant amount of time and money by automating repetitive tasks, such as sending welcome emails, follow-up emails, and abandoned cart emails. This can free up employees to focus on more strategic tasks.
- **Improve customer engagement:** Email automation can help businesses improve customer engagement by sending targeted and personalized emails at the right time. For example, an automated email can be sent to a customer who has abandoned their shopping cart to offer a discount or remind them of the items they left behind.
- **Increase sales:** Email automation can help businesses increase sales by nurturing leads, promoting products and services, and driving traffic to their website.
- **Generate ROI:** Email automation can be a very cost-effective way to generate ROI for businesses. In fact, a study by Campaign Monitor found that automated emails generate 320% more revenue than non-automated emails.

Examples of email automation

- **Welcome series:** A welcome series is a series of automated emails that are sent to new subscribers. These emails can be used to introduce the subscriber to the company, its products or services, and its values.
- **Abandoned cart emails:** Abandoned cart emails are sent to customers who have added items to their shopping cart but then left the website without completing their purchase. These emails can be used to remind the customer of the items they left behind and offer a discount or other incentive to complete their purchase.
- **Transactional emails:** Transactional emails are sent to customers to confirm orders, provide shipping information, and send receipts. These emails can be used to build trust and rapport with customers.
- **Nurturing campaigns:** Nurturing campaigns are a series of automated emails that are sent to leads to move them further down the sales funnel. These emails can be used to educate leads about the company's products or services, answer their questions, and build relationships.

Email automation software

There are many different email automation software programs available, each with its own strengths and weaknesses. Some of the most popular options include:

- Mailchimp
- Constant Contact
- Drip
- ActiveCampaign
- HubSpot

LEAD GENERATION:

Lead generation in email marketing is the process of using emails to gather information from potential customers and nurture them into paying customers. It is a cost-effective way to reach a large audience and build relationships with potential customers.

There are a number of different ways to generate leads in email marketing. Some of the most common methods include:

- **Creating opt-in forms:** Opt-in forms are used to collect email addresses from potential customers. They can be placed on your website, in your blog posts, or in your social media profiles.
- **Offering valuable content:** You can offer valuable content, such as white papers, e-books, or webinars, in exchange for an email address. This is a great way to attract potential customers who are interested in your products or services.

- **Using gated content:** Gated content is content that is only accessible after providing an email address. This can be a good way to generate leads from potential customers who are ready to take the next step in their buying journey.
- **Running contests and giveaways:** Contests and giveaways are a fun and engaging way to generate leads. People are more likely to enter a contest or giveaway if they have to provide their email address.
- **Using lead magnets:** Lead magnets are valuable resources that you offer in exchange for an email address. They can be anything from checklists and templates to case studies and white papers.
- **Promoting your email list on social media:** You can promote your email list on social media by sharing links to your opt-in forms or landing pages. You can also run social media contests or giveaways that require participants to sign up for your email list.

Once you have generated a list of leads, it is important to nurture them with email marketing campaigns. These campaigns can help you to:

- **Introduce your company and its products or services:** Your first few emails should focus on introducing your company and its products or services to your leads. You should also provide them with valuable information that will help them to solve their problems.
- **Build trust and rapport:** You can build trust and rapport with your leads by sending them personalized emails. You should also address their questions and concerns promptly.
- **Move them further down the sales funnel:** Your goal is to move your leads further down the sales funnel until they are ready to buy from you. You can do this by sending them targeted emails that encourage them to take action, such as downloading a white paper, signing up for a demo, or contacting you for more information.

INTEGRATING EMAIL WITH SOCIAL MEDIA AND MOBILE:

Integrating email with social media and mobile devices can be a powerful way to reach a wider audience, increase engagement, and boost sales.

Here are some of the benefits of integrating these channels:

1. **Wider reach:** By integrating email with social media and mobile, you can reach a wider audience of potential customers. Social media platforms have billions of active users, and mobile devices are ubiquitous. By integrating your email marketing with these channels, you can expose your brand and message to a much larger audience.
2. **Increased engagement:** Social media and mobile devices are highly engaging platforms, and integrating them with email can help you increase engagement with your audience. You can encourage social sharing of your email content, use social media to drive traffic to your email signup forms, and use mobile apps to deliver personalized email notifications.

3. Boosted sales: Integrating email with social media and mobile can also help you boost sales. You can use social media to promote your email campaigns, use mobile apps to facilitate purchases, and use email to drive traffic to your social media pages.

Here are some specific ways to integrate email with social media and mobile:

1. Add social sharing buttons to your emails: Make it easy for your email recipients to share your content on social media by adding social sharing buttons to your emails. This will help you reach a wider audience and increase engagement.
2. Promote your email list on social media: Promote your email list on your social media pages and profiles. Encourage people to sign up for your email list by offering incentives, such as exclusive content or discounts.
3. Use social media to drive traffic to your email signup forms: Create social media posts that direct people to your email signup forms. You can also use social media ads to promote your email list.
4. Use social media to personalize your email campaigns: Use social media data to segment your email list and send more personalized emails. For example, you can send emails to people who have interacted with your brand on social media.
5. Use mobile apps to deliver personalized email notifications: Use mobile apps to deliver personalized email notifications to your users. For example, you can send a notification when a product they are interested in goes on sale.
6. Use email to drive traffic to your social media pages: Include links to your social media pages in your emails. Encourage people to connect with you on social media to stay up-to-date on your latest news and offers.

MEASURES THAT MAXIMIZE THE EMAIL CAMPAIGN EFFECTIVENESS

Maximizing the effectiveness of your email marketing campaigns involves a combination of strategic planning, thoughtful execution, and continuous optimization. Here are several measures you can take to ensure the success of your email campaigns:

Define Clear Objectives:

Clearly define the goals and objectives of your email campaign. Are you aiming to drive sales, generate leads, increase website traffic, or build brand awareness? Understanding your objectives is the first step in crafting an effective campaign.

Segment Your Email List:

Segment your email list based on demographics, behaviors, purchase history, or other relevant criteria. Sending targeted and personalized content to specific segments increases relevance and engagement.

Create High-Quality Content:

Craft compelling and relevant email content that provides value to your subscribers. Use persuasive copy, visually appealing design, and clear calls to action (CTAs) to encourage user engagement.

A/B Testing:

Conduct A/B tests on different elements of your email campaigns, such as subject lines, email copy, CTAs, images, and sending times. Analyze the results to determine what resonates best with your audience.

Optimize for Mobile:

Ensure that your emails are mobile-responsive and display correctly on various devices and email clients. Mobile optimization is crucial, as a significant portion of emails is opened on mobile devices.

Personalization:

Incorporate personalization elements like recipient names and personalized product recommendations to make emails feel more tailored to the individual recipient.

Optimize Subject Lines:

Write attention-grabbing subject lines that are concise, relevant, and compelling. The subject line is the first thing recipients see, so it should encourage them to open the email.

Timing and Frequency:

Consider the timing and frequency of your email sends. Test different days and times to determine when your audience is most responsive, and avoid overwhelming them with too many emails.

Segmented Email Automation:

Implement automated email workflows triggered by user behavior, such as welcome emails, abandoned cart reminders, and post-purchase follow-ups.

Provide Value and Relevance:

Ensure that every email you send provides value to your subscribers. Offer helpful content, exclusive discounts, educational resources, or solutions to their pain points.

Monitor and Analyze Data:

Regularly track key email metrics like open rates, click-through rates (CTR), conversion rates, and unsubscribe rates. Use this data to make informed adjustments and improvements to your campaigns.

Testing and Continuous Improvement:

Continuously analyze and refine your email marketing strategy based on data and performance insights. Experiment with new tactics and strategies to keep your campaigns fresh and effective.

Compliance and Privacy:

Stay up-to-date with privacy regulations and obtain explicit consent for email marketing. Respect user preferences and privacy to build trust.

Feedback and Surveys:

Encourage feedback from your subscribers through surveys or direct inquiries. Understanding their preferences and needs can help tailor your email campaigns.

MOBILE MARKETING

Mobile marketing is the process of marketing and advertising to consumers using smartphones and tablets.

Typically, mobile advertising strategies take advantage of mobile device features such as push notifications and location awareness to deliver more timely and relevant ads.

5 MOBILE MARKETING STRATEGIES:

1.SMS Marketing

SMS marketing is marketing via text messages. It's also known as text message marketing or text marketing. This is a permission-based mobile marketing strategy in which brands send promotions, deals, coupons and other alerts straight to potential customers' phones via text messages of 160 characters or less.

One of the reasons SMS marketing is such a powerful mobile advertising strategy is because text messages have high deliverability, open and engagement rates.

2.Social Media Marketing

Many smartphone owners use them to access social media. Statista shows that globally, Facebook has more than 2.8 billion monthly active users, with YouTube, WhatsApp, and Instagram close behind. With all of those users in one place, it makes sense to use social media as one of your main mobile marketing strategies.

Some options include:

- Facebook ads, or boosted (promoted) posts
- Promoted tweets on Twitter
- Shoppable or promoted pins on Pinterest
- LinkedIn ads or promoted posts

3.Location-Based Marketing (GPS)

Location-based marketing uses the GPS function on smartphones to help marketers show promotions and relevant content according to users' locations. Sometimes location-based marketing is called geotargeting or geolocation marketing.

For example, you can show a promotion for a restaurant to someone who's in the area and encourage that person to visit the restaurant. Coach used location targeting to drive thousands of visits to its stores, so this is a proven way to increase foot traffic.

4.Proximity Marketing

Proximity marketing is another form of location-based marketing. This lets you use Bluetooth to figure out where potential customers are, and target them with appropriate promotions.

One example of this is beacon marketing, which relies on physical Bluetooth-enabled devices in or near stores. These send short-range signals to mobile devices, which people see when they are near your location. This is another proven way to drive foot traffic. Toyota used proximity marketing to attract more customers likely to buy at local car dealerships.

5.In-app Marketing

Smart marketers can't ignore the app market. According to Business of Apps the top five apps include TikTok, Instagram, Facebook, WhatsApp, and Telegram — but there are hundreds of thousands of other apps, which is why in-app advertising has become a key mobile marketing strategy.

Types of in-app advertising include:

Display advertising like banners that appear at the top or bottom of a mobile screen

Native advertising, which are promotions styled to mimic the app environment

Video ads

Interstitial ads, which appear in between app actions. For example, sometimes these ads appear when moving from one game level to another

MOBILE MARKETING CHANNELS

There are many mobile marketing channels, including:

SMS – this is the oldest mobile marketing channel. It involves companies sending customers messages via mobile phones.

Email – Email marketing also goes back a long way. It involves sending emails to users who have opted in their contact information.

Social media – companies can design targeted ads on social media platforms such as Facebook, Twitter, and Instagram.

Websites – both the company's and influencers' websites are a great place to promote the company service. Regarding mobile marketing, websites need to be responsive (mobile-friendly) to provide users with a more seamless experience.

Mobile apps – advertisers can purchase ad spots in mobile apps to promote their services or products.

Methods of mobile marketing:

Location-based – for example, you can create ads that target customers within one mile of your store.

QR codes – these are barcodes that contain information. Users can scan the code to download the app or visit the company's landing page.

In-game advertising – showing banner or video ads while people use the app.

Voice marketing – automated phone calls to promote goods and services

Mobile wallet – send offers via mobile wallet apps and reward points on the purchase

Content based marketing:

Mobile content marketing is a content marketing that is optimized and adjusted for smartphones and mobile devices.

It is simply content marketing that allows the information from the brand to be shared via apps, social media channels or websites.

How to improve mobile content marketing:

1. Optimize your landing page

2. Focus on the right audience

3. Make use of localized content

Localized content is a type of content you create to target local customers. People who use their mobile devices to search online are more likely to respond to localized content. Any platform that targets a group of people who share a similar interest is important when creating localized content.

The mobile content marketing that focuses on localization includes:

Topic update – configure Google Alerts to know which topics are trending in a specific region and use Google Analytics to get location from visitors; then you can select regional topics for regional visitors and create personalized content,

Local keywords – add such keywords to the content, to meta properties, and as ALT tags; that's guaranteed visibility,

Google map optimization – its API allows integration; you can create and integrate positive content into the map listing.

4. Bring out the best call to action

MOBILE APPS IN DIGITAL MARKETING

Mobile apps play a significant role in digital marketing, offering businesses a direct and personalized way to engage with their target audience. Here are several ways in which mobile apps are utilized in digital marketing:

1. Branding and Awareness:

- **Branded Apps:** Companies create mobile apps to establish a stronger brand presence. Branded apps can serve as a constant reminder of the brand on users' devices.
- **EG)...** Brands like Starbucks, Walmart, and Nike leverage branded apps to engage customers, improve brand recognition, and boost sales.

2. Customer Engagement:

- **Push Notifications:** Apps allow businesses to send push notifications directly to users' devices, keeping them informed about new products, promotions, or relevant content.
- **In-App Messages:** Companies can engage users with personalized messages or offers within the app, enhancing the overall user experience.

3. E-commerce and Sales:

- **Mobile Commerce (E Commerce):** Many businesses have dedicated apps for online shopping, making it convenient for users to browse and purchase products.
- **Mobile Payments:** Integrated payment options in apps facilitate seamless and secure transactions.
- Examples of m-commerce include in-app purchasing; mobile banking virtual marketplace apps, such as the Amazon mobile app; and digital wallets, such as Apple Pay, Google Pay and Samsung Wallet.

4. Data Collection and Analytics:

- **User Behavior Tracking:** Apps collect data on user behavior, helping businesses understand customer preferences, track engagement, and make data-driven decisions.
- [Jotform](#), [Smartsheet](#), [Device Magic](#) and [Zoho Forms](#)

- **Analytics Integration:** Integration with analytics tools allows businesses to measure the app's performance and optimize marketing strategies.

5. Personalization:

- **User Profiles:** Apps often have user accounts that allow for personalized experiences. This includes tailored content recommendations, personalized offers, and a customized user interface.
- **Location-Based Marketing:** Apps can leverage location data to provide users with location-specific offers or content.eg)...Instagram

6. Social Media Integration:

- **Social Sharing:** Apps often integrate with social media platforms, enabling users to share content and promotions with their network, expanding the brand's reach.
- **Social Login:** Simplifying the registration process by allowing users to log in with their social media accounts can enhance user convenience.

7. Customer Loyalty Programs:

- **In-App Rewards:** Apps can host loyalty programs, offering rewards, discounts, or exclusive access to encourage customer retention.

8. Content Marketing:

- **Content Delivery:** Apps provide a platform for businesses to deliver exclusive content, such as articles, videos, or podcasts, directly to users.

9. Feedback and Reviews:

- **In-App Surveys:** Businesses can collect feedback through in-app surveys, helping them understand customer satisfaction and areas for improvement.
- **Review Requests:** Apps can prompt users to leave reviews or ratings, influencing potential customers.

MOBILE COMMERCE

Mobile commerce, also known as m-commerce, refers to the buying and selling of goods and services through wireless handheld devices such as smartphones and tablets. M-commerce is a subset of e-commerce, which is the buying and selling of goods and services over the internet.

SMS CAMPAIGN:

SMS marketing is a powerful tool that can be used to reach a large audience and achieve a variety of marketing goals. It is a cost-effective way to send targeted messages to your

customers and prospects, and it can be used to drive traffic to your website, promote your latest products or services, and generate leads.

Here are some ideas for how to use SMS marketing:

- Send out welcome messages to new customers: Welcome new customers to your business with a personalized SMS message. This is a great way to make a good first impression and build relationships with your customers.
- Promote your latest products or services: Use SMS marketing to promote your latest products or services. You can include links to your website or landing pages in your messages so that people can learn more about your offerings.
- Send out abandoned cart reminders: If a customer abandons their shopping cart on your website, send them an SMS reminder to encourage them to complete their purchase.
- Offer exclusive discounts and promotions: Use SMS marketing to offer exclusive discounts and promotions to your customers. This is a great way to drive traffic to your website and boost sales.
- Send out birthday and anniversary greetings: Send out personalized birthday and anniversary greetings to your customers. This is a great way to show your customers that you care about them and their business.
- Collect customer feedback: Use SMS marketing to collect customer feedback. This is a great way to learn more about your customers' needs and wants.
- Run contests and giveaways: Run contests and giveaways to generate excitement and engagement around your brand.
- Send out breaking news and announcements: Use SMS marketing to send out breaking news and announcements to your customers. This is a great way to keep them informed and engaged.

PROFILING AND TARGETING:

Profiling and targeting are essential aspects of marketing that allow businesses to identify and reach their ideal customers with tailored messages and campaigns.

Profiling involves gathering information about potential customers to understand their characteristics, preferences, and behaviors. This information can be collected through various methods, such as surveys, market research, customer interactions, and website analytics.

Targeting utilizes the insights gained from profiling to select the most relevant audience segments for specific marketing campaigns. This process involves identifying the characteristics and behaviors that align with the products or services being offered.

Examples of Profiling and Targeting

1. Ecommerce: Online retailers use customer purchase history, browsing behavior, and demographic information to create profiles and target personalized product recommendations, discounts, and promotions.

2. **Social Media Advertising:** Social media platforms allow businesses to target their ads based on user interests, demographics, and online activities, ensuring that their ads are seen by the most relevant audience.
3. **Email Marketing:** Email marketing campaigns can be segmented based on customer profiles, allowing businesses to send targeted emails with relevant content and offers that are more likely to be opened and acted upon.

Profiling and Targeting Tools

1. **Customer Relationship Management (CRM) Software:** CRM systems provide a centralized platform to store and manage customer data, enabling businesses to create detailed profiles and segment their audience effectively.
2. **Data Analytics Platforms:** Data analytics tools help businesses collect, analyze, and interpret large datasets of customer information, providing insights that can be used for profiling and targeting purposes.
3. **Marketing Automation Software:** Marketing automation software can automate the process of segmenting customer lists and sending targeted messages based on specific profiles and behaviors.

UNIT 4

SOCIAL MEDIA MARKETING (SMM)

Social media marketing (SMM) is the use of social media platforms to promote a product or service. SMM can be used to build brand awareness, increase sales, and drive website traffic. It can also be used to generate leads, provide customer support, and manage customer relationships.

Tips for social media marketing

Use a variety of content formats: Share images, videos, infographics, and blog posts to keep your audience engaged.

Use social media advertising: Paid advertising can help you reach a wider audience and achieve your goals more quickly.

Collaborate with influencers: Partner with influencers in your industry to reach a wider audience and build credibility.

Monitor your brand mentions: Use social media listening tools to track what people are saying about your brand online.

Use social media to drive customer support: Offer customer support on social media to resolve issues quickly and efficiently.

Examples of social media marketing

- A company shares a blog post on Facebook about the benefits of their product.
- A restaurant posts a photo of their new menu on Instagram.
- A clothing store runs a contest on Twitter to give away a free outfit.
- A software company shares a video on YouTube about how to use their product.
- A travel agency uses LinkedIn to connect with potential customers.
